ECTS

ECTS (European Credit Transfer and Accumulation System) is a learner-centred system for credit accumulation and transfer based on the transparency of learning outcomes and learning processes. It aims to facilitate planning, delivery, evaluation, recognition and validation of qualifications and units of learning as well as student mobility. ECTS is widely used in formal higher education and can be applied to other mobility learning activities.

The ECTS grading tables below describe the statistical distribution of passing grades in the first and second cycle programs, based on the total number of grades awarded during the last five years.
